DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 102, 108, 112 etc. (Fig. 1). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 and 5-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Oettinger et al. P.N. 5,428,658.

Oettinger et al. discloses an x-ray source with a flexible probe. The probe generates therapeutic radiation as described in connection with the figure drawings (see e.g. Fig. 20A and 22). Of critical importance to the limitations of the instant claims at issue, is the non-planar target. Such target 228, 228A is clearly shown by Oettinger et al. All limitations of the claims at issue in their present form are met by Oettinger et al.

Art Unit: 2859

Allowable Subject Matter

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dinsmore '573 and '419 disclose therapeutic radiation sources. Applicant is believed to be intimately familiar with the contents of these documents.
